Xerox® Mobile Print Solution

Supporting mobile workers is no longer an option. The mobile workforce is here to stay, and it's using smartphones and tablets to stay productive. Now it's a matter of ensuring productivity in a secure way. How? Xerox® Mobile Print Solution. Users can carry on their mobile workflow, including directly printing documents, whenever and wherever they need them.

Productivity for Your Mobile Workforce and Your IT Team

Xerox® Mobile Print Solution increases employee productivity by keeping users connected to enterprise document workflows. It's easy to manage, so IT spends less time on support, and you don't sacrifice productivity for security, or ease of use for control. Plus, you don't have to worry about device compatibility or even hosting.

- Immediately enable mobile workers to print securely from smartphones, tablets or laptops.
- Minimize IT impact with deployment and management by Xerox.
- Keep problems away from your IT staff with the support of our experienced global delivery and tech teams.
- Minimize constant configuration for guest printing.

Wherever your workforce goes, productivity will follow.

Convenient Access to Documents

Xerox® Mobile Print Solution removes barriers to convenient mobile printing—including compatibility issues, skewed formatting or locked-up large files.

- Free mobile app for Apple, Google, Windows and RIM devices.
- No print driver download required.
- Submit documents through Xerox® Mobile Print App or email.
- Handles large files, so employees won't resort to unauthorized workarounds for important documents
- Reduce delays through user preference settings and media selection options. Print faster with web page, OpenOffice and Zip printing features.
- Increase your options with our public printing and home-based worker integration option.

Compatibility and Choices Deliver Flexible Mobility

Flexible device-neutral workflows universally support printing from desktop, laptop, tablet and smartphone.

- Print from any email-capable wireless device to any enabled Xerox® or Non-Xerox® printer or MFD in your environment.

Public Printing Closes the Gap in Enterprise Mobility Strategies

A cohesive mobile print strategy with a single enterprise and public print solution, this optional feature exposes public hot-spot printers through partnership with EFI PrintMe. That way, mobile workers can access sponsored, controlled print access at public locations.

- Users can do location-based searching, discover alternate locations, get site details including printing capabilities, location address, building, phone numbers, and driving directions.
- Allows printing to devices located at multiple sites.
- Reduce helpdesk calls to assist mobile users with finding and mapping printers.
- Enable public printer networks or continue as private solution.

Right Fit for Large-scale Needs

Designed for large-scale business use thanks to built-in scalability. Run on your hardware or let Xerox host it.

- Integrated printing with active directory, Microsoft Exchange and Lotus Domino email servers and Equitrac Follow-You printing.
- Extensive language support for use of same technology across your global enterprise.

Secure Extension of Workflows

Mobile workers can print from any mobile device to any printer simply, securely and without compromising document quality.
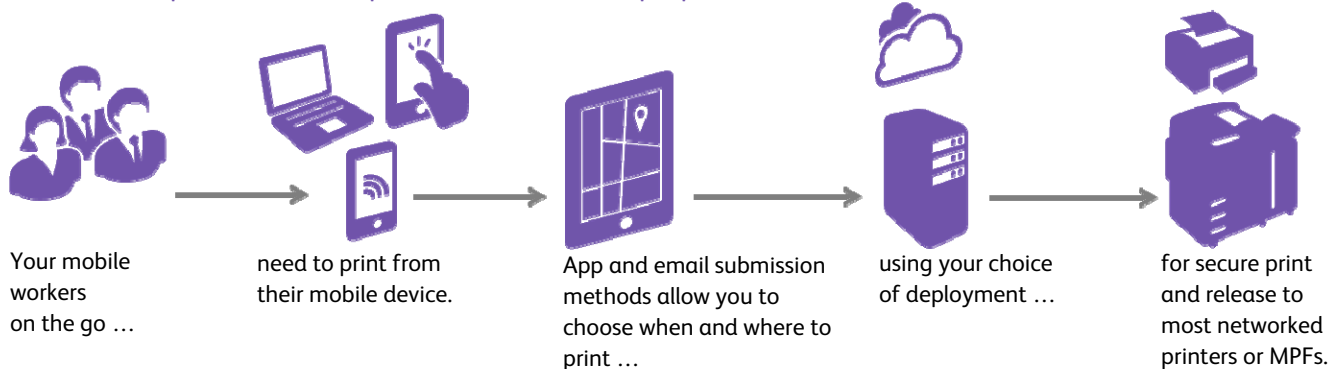

- Three layers of secure print deployment.
- Secure Print passcode-gated printing option for Xerox® devices.
- Establish access controls that allow or block mobile print.
- Securely hold documents until users log in and release for print.
- Enhanced LDAP authentication and accounting for user-based tracking.
- Secure Card Reader and Follow-You Printing solutions provide safe, unified end-user experience.

The Power of Xerox Support

Get everything you need for mobile productivity.

- Core MPS capabilities provide mobility foundation.
- Integrated tools and service
- Xerox owned and controlled solution and updates.
- Integrated management and reporting across your enterprise.
- Enterprise-level approach and portfolio cover range of devices.

Xerox® Mobile Print enables you to print from most mobile devices, including mobile smartphones, feature phones, tablets and laptops.

Your mobile workers on the go … → need to print from their mobile device. → App and email submission methods allow you to choose when and where to print … → using your choice of deployment … → for secure print and release to most networked printers or MPFs.
